

Shape: Class 1 and 2 are unimodal & roughly symmetric, whereas Class 3 is left skewed & unimodal

Center: The approx. median of Class 1 and 2 are equal, at around 65, which is lower than the approx. median of Class 3 which is around 80.

Spread: The ranges of all 3 classes are approximately equal at (30, 100). Class 1 would have the lowest IQR, Class 3 the next highest, and Class 2 the highest IQR.
